Entry Landing Page:

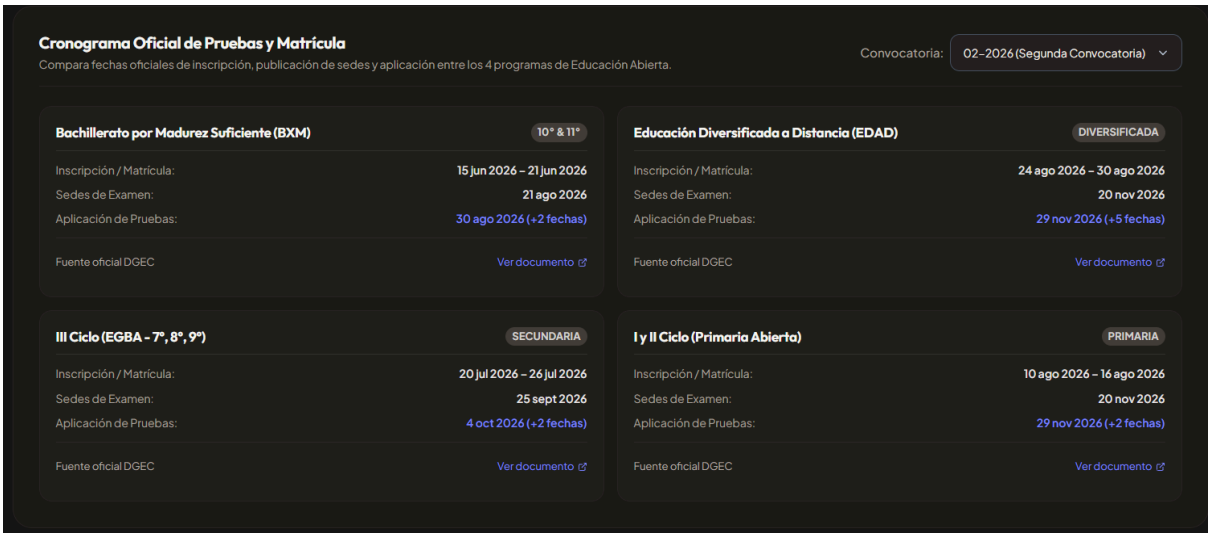

Feedback: little use of available space, header too centered

Programs page:

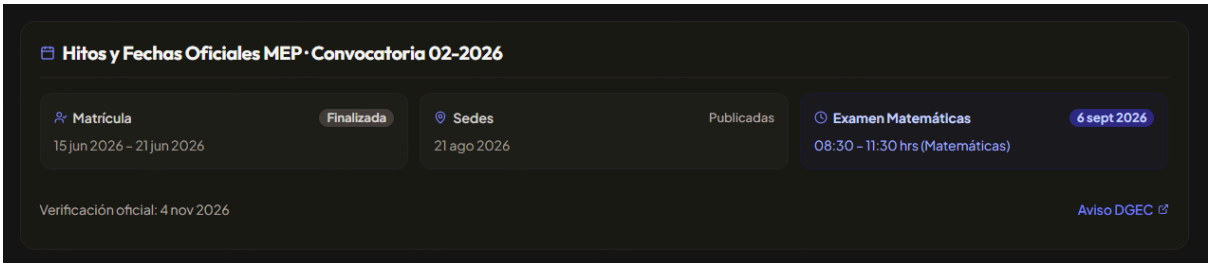

Feedback: Another instance of layout page-like and centered, additionally, each program card has various text elements, in such a tiny size, creates visual noise, proper use of larger screens to expand size, and adjustment in smaller screens by making a one visible card that can be flipped to show others, swiped

Cronograma/Dates View:

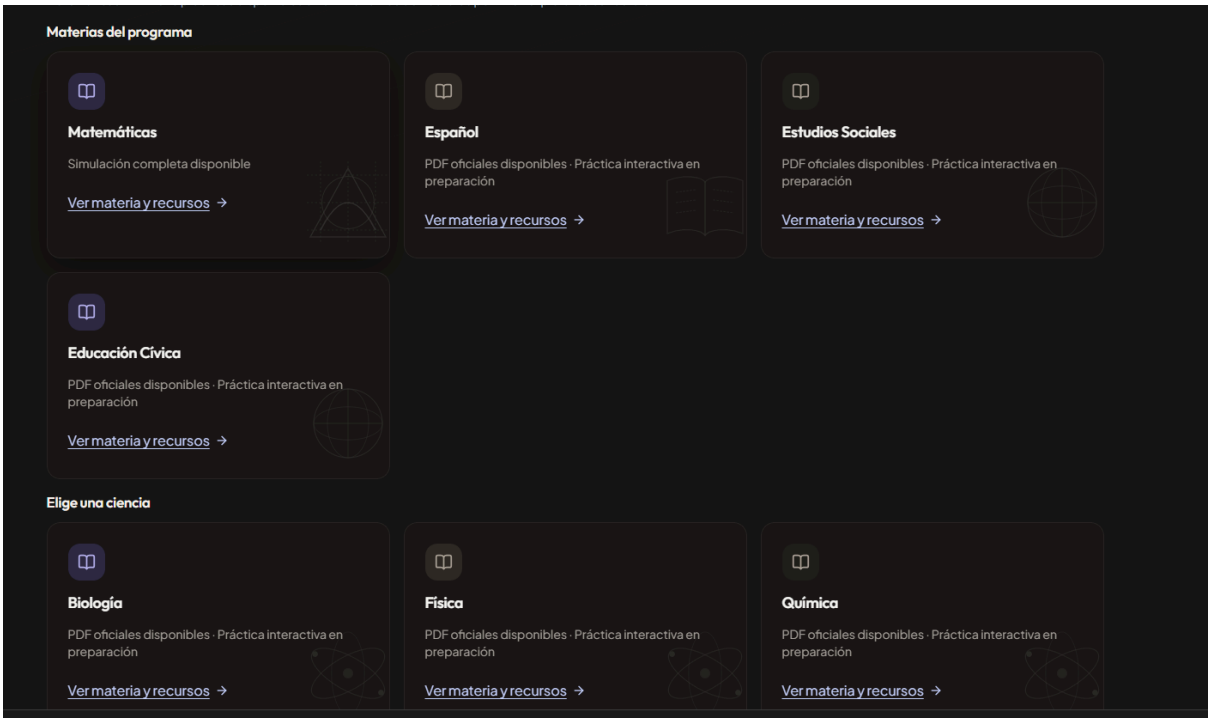

Feedback: Visualization from Programs page delivers high level view. However, we want it more interactive and modular within the same element frame (e.g clicking/pressing a card opens an expanded view, etc, just a sample idea), navigable within frame element

Hitos y Fechas Oficiales MEP:

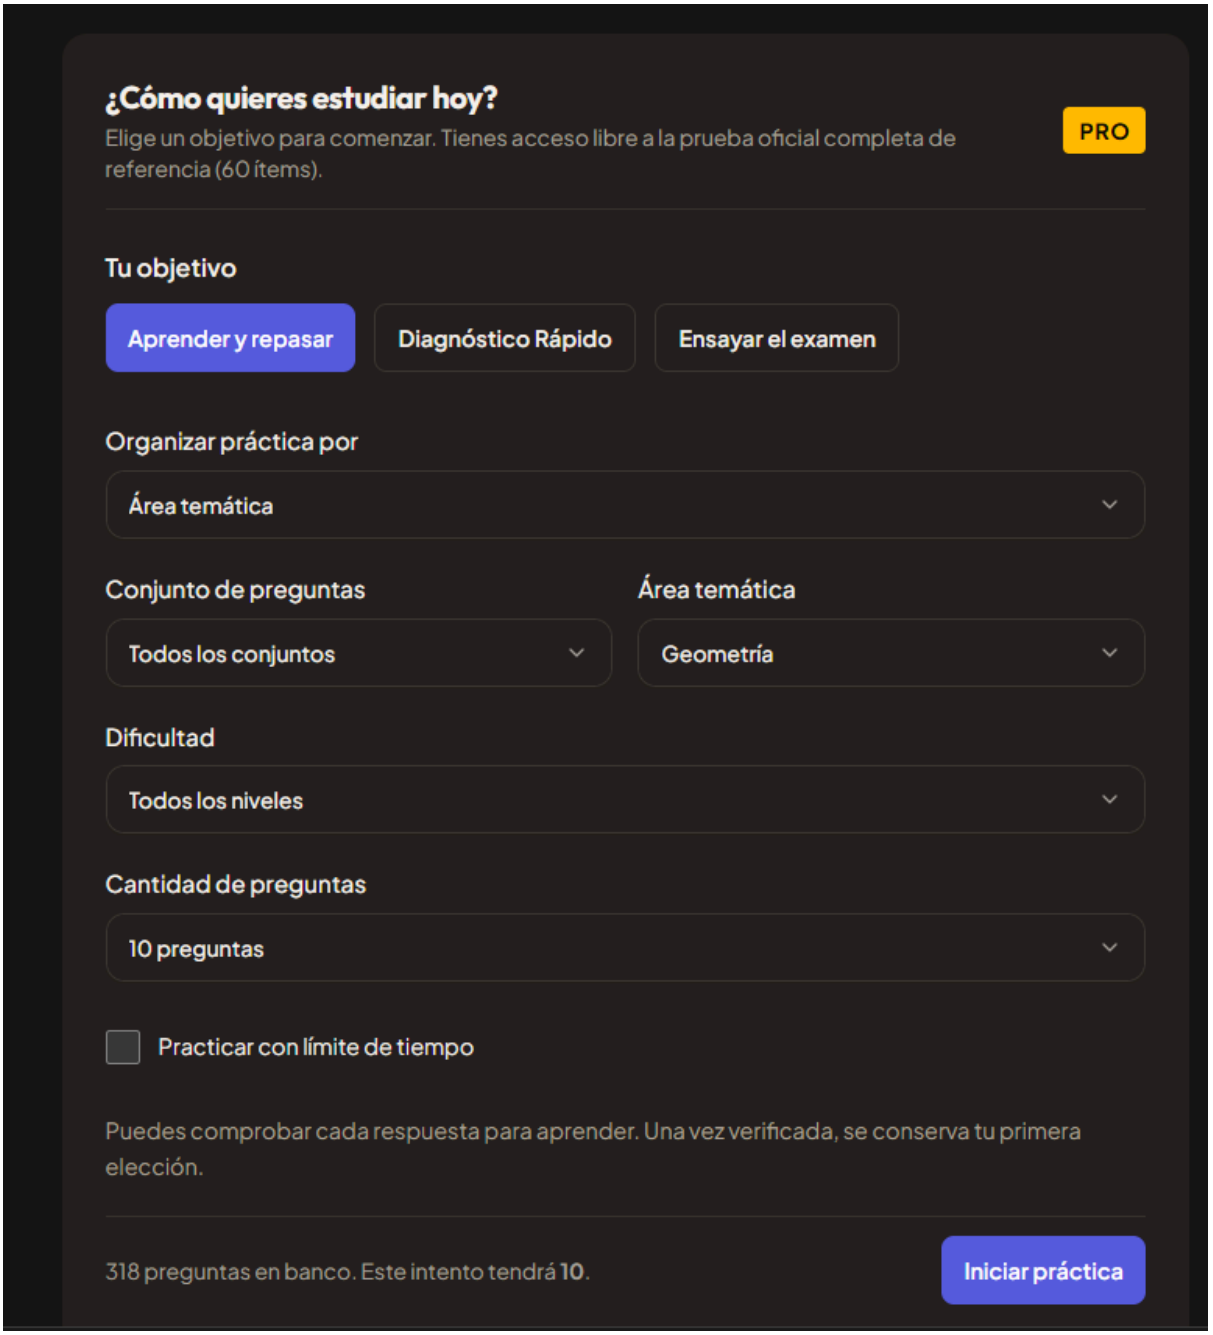

Feedback: Verificación oficial: 4 nov 2026 changed to “ultima actualizacion: date of last processed docs”. Moreover, be able to show if a test has passed already (e.g in this case tihs test already passed)

Subject View of a Program:

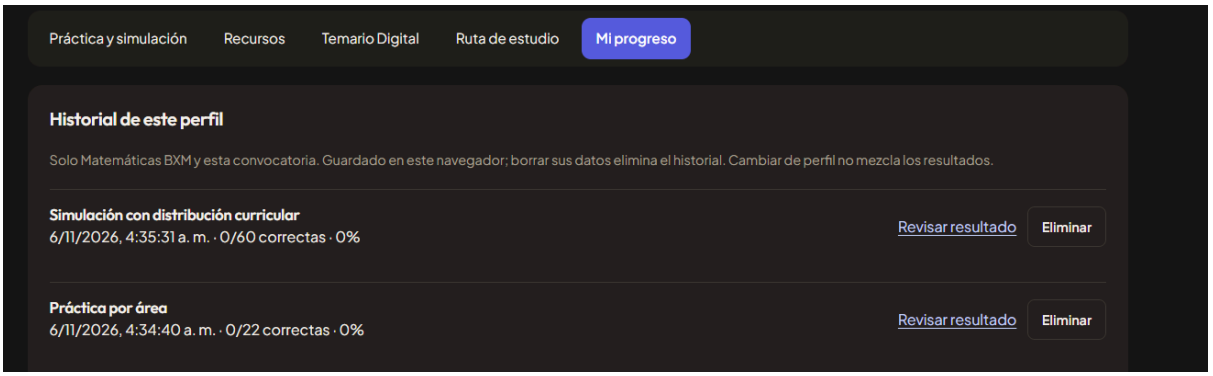

While design is not incorrect, let's optimize visualization and navigation of options sharing a similar element. To a more compact area, expandable, compact, etc

Learning Config

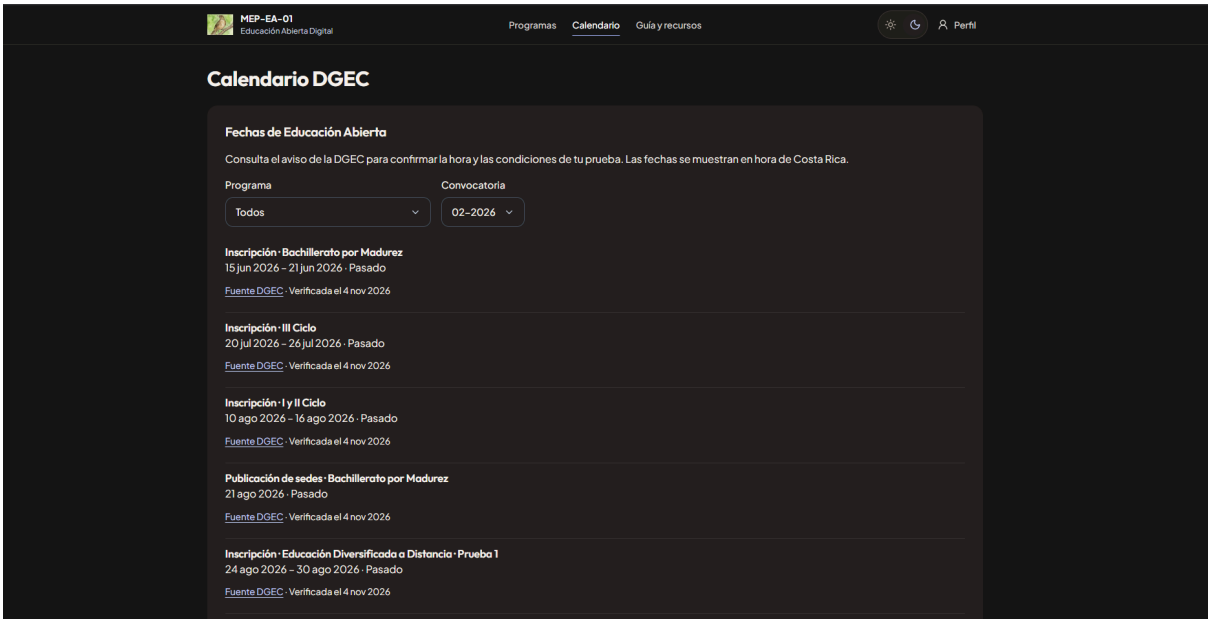

The current question set has increased. We've been transitioning to a clearer and more compact UI/UX design, this style was created for testing and validation purposes, but we can define it more and improve upon it (aplies to Diagnostico Rapido, Ensayar el Examen

Mi Progreso section:

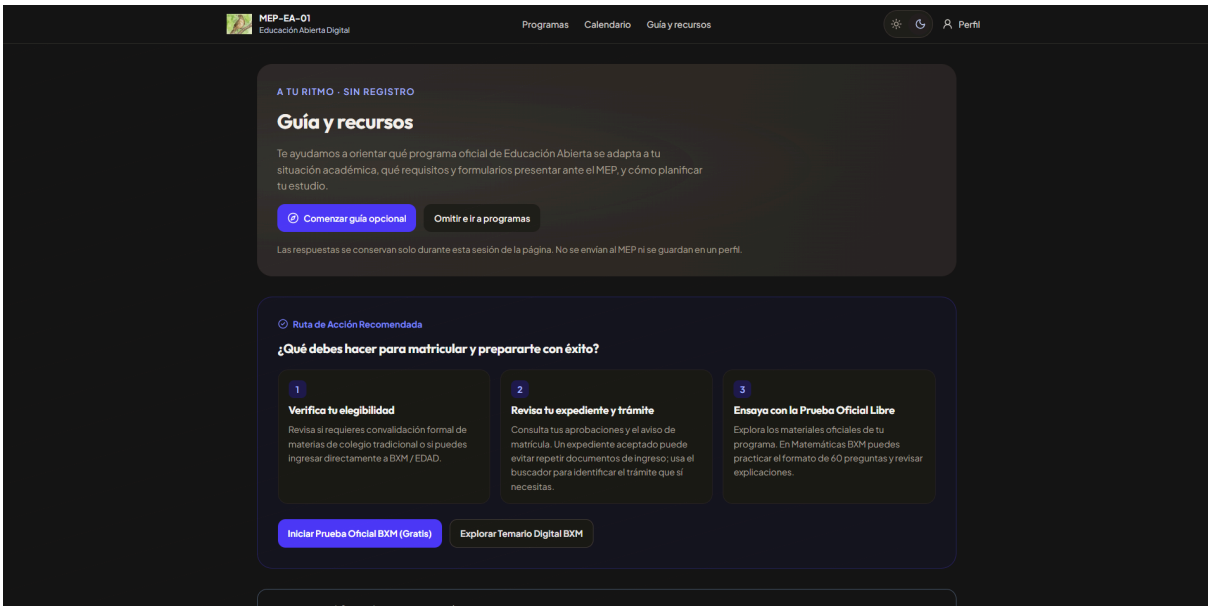

Needs a one button to erase all at once.

Calendar:

This style is too plain. Let's change for a modular, dynamic and interactive Calendar/Schedules, Events View with smart filter options to reduce visual noise

Guia y Recursos:

This section has excellent style for the first elements. However, since it contains various features, these are all placed one after the other, requiring users to scroll down to the end for the last feature. Let’s rethink this section for a more modular, dynamic, interactive view of resources
